Art Unit: 3634

1. This application contains claims directed to the following patentably distinct species:

Species I of the wall with a set of doors as drawn to figures 1-3;

Species II of the wall with a set of doors as drawn to figures 4-11;

Species III of the wall with a set of doors as drawn to figures 15-19;

Species IV of the wall with a set of doors as drawn to figure 20.

The species are independent or distinct because they contain mutually exclusive structural characteristics such as a drum about which the shutter is wound, a rigid door provided as a sectional door, guide tracks of a profiled H-shaped cross section, a mounting strip, a guide surface in the form of a cylinder, a compressible flap, a bead, a rack wheel co-operating with a rack, a cutout of the top section or wall, a rigid pivoting door.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3634

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

A telephone call attempt was made to Sheridan Neimark to request an oral election to the above restriction requirement, but did not result in an election being made.
